

# IS INCINERATION THE ANSWER?

Waste Recycling Group (WRG) has submitted a planning application to expand the burning capacity of Nottingham's incinerator by 100,000 tonnes. N.A.I.L believes that incineration is not the solution to waste management and our resources are much better placed in reducing, re-using and recycling.

**SAY NO TO A LETHAL COCKTAIL OF TOXIC SUBSTANCES POLLUTING OUR AIR.** WRG's incinerator has breached authorised emission levels 34 times in the last four years. These emissions include **carbon monoxide, lead, mercury and nitrogen oxide** and on one occasion the amount of cancer-causing **dioxins** was found to be 9 times the legal limit!

**SAY NO TO WASTE IMPORTED FROM OTHER COUNTIES OF THE EAST-MIDLANDS.** To reach their targets WRG want to import waste from Derbyshire, Leicestershire and Lincolnshire to burn in Nottingham.

**SAY NO TO AN EXTRA 53 LORRIES ON OUR ROADS EVERY DAY,** causing more traffic congestion and increased pollution.

**SAY NO TO AN INEFFICIENT HEATING SYSTEM.** Enviro Energy is running at a £700,000 a year loss and we, the Council Tax payer, are footing the bill.

**SAY YES TO INCREASED RECYCLING AND CLEANER AIR.** Our city council's current level of recycling is a pitiful 14%. As much as 80% of our household waste can be recycled.

**SAY YES TO A PROGRESSIVE WASTE MANAGEMENT STRATEGY.** Our Health, our future, our children are at risk. No more pollution for profit.
